

Annual National Report for Romania

For the attention of the Vasco da Gama Movement Europe Council

1. Name of NEC: **Raluca Zoitanu**
2. Other people who are supporting your activities: **none involved in VdGM, 4 others in the national young GP group on a local level**
3. Have you applied for the Erasmus+ funds? **No. I registered the association so it can be a partner for other countries.**
4. What activities have you developed in your country to promote VdGM in the last year (for example to promote the Hippokrates and Carosino programs): **news stories on the website and in the newsletter of the National Society of Family Medicine, the young GP group, mailing lists of GPs, presentation at the annual National Conference and other regional conferences**
5. How many exchange applications have you had? **4 for Conference Exchanges (one was me 😊), none for Hippokrates**
6. Is there any active member from the VdGM theme groups in your country? Please specify - if yes: what are their activities? **Yes, me, as liaison for the Image Group 😊**
7. Please tell us about your national young GP organization's activities: **Launched at the end of 2012, it now has around 160 (mostly inactive) members and a Yahoo and Facebook group to communicate. Since January 2014 we started selecting regional coordinators for the 8 regions of the country, to try and engage colleagues more on a local/regional level rather than national. 4 coordinators so far and results are promising: young GP group mini-sessions (30 min) organised at 2 regional conferences. One 1h30' session at the annual national conference. Just presentations so far but young GPs seem to be slowly increasing in numbers as participants to these events. Planning to organise a Conference Exchange for VdGM members in 2015 if we recruit enough hosts.**
8. Do you receive financial support from your country's GP organization? **Yes, 40% for the annual EC meeting and Wonca conference. 100% for 2 national events per year.**
9. Do you have any proposals for VdGM? **Each theme group to think of 1-2 projects/year to increase visibility and offer something to engage in for young GPs coming into contact with VdGM for the first time (at preconf, exchanges etc.). Otherwise we seem to lose them.**

Please send this report before 31st May 2014.

Further instructions regarding the presentations of the Annual Reports will follow. You are kindly reminded that you must read the reports before the next VdGM meeting in Lisbon.
